💼 Experience

Backend Developer Trainee.

Function-Up

Banglore, India

Experience:Backend Developer

- Received comprehensive training in Backend Development utilizing Node.js, Express.js, and MongoDB.
- Developed proficiency in building RESTful APIs and handling data storage and retrieval operations.
- Demonstrated familiarity with front-end technologies including HTML, CSS, JavaScript.
- Applied AWS S3 for secure and scalable file storage and retrieval.
- Utilized Redis for efficient caching, improving application performance.
- Dedicated time to learn and apply fundamental Data Structures and Algorithms (DSA) concepts.
- Utilized strong problem-solving skills to troubleshoot and resolve backend development challenges.
- Collaborated effectively with team members using Git for version control and code collaboration.

🏅 Courses

ChatGPT Prompt Engineering for Developers

- Completed ChatGPT Prompt Engineering for Developers course by OpenAI and DeepLearning.AI.

Typing Test - FREE Professional Certificate ☑

- Achieved Significant Improvement in Typing Speed.

### AI Tools & ChatGPT WorkshopCertificate ☑

- Empowered with AI Tools and ChatGPT Expertise
📁 Projects

Blogging Site

- **Project :** ■ GitHub ☑
- Developed a blogging website using Node.js and Express.js.
- Implemented CRUD operations to manage blog posts, enhancing data management efficiency.
- Utilized Express.js middleware for routing and handling HTTP requests.Employed MongoDB.

FlipCraft

- **Project :** ■ GitHub ☑
- Created Flipcraft project using Node.js, Express.js, and MongoDB, implementing secure login mechanisms like JWT for user authentication and authorization.
- Managed inventory, categories, and product details with CRUD operations.
AadharEase

- **Project :**| ■ GitHub ☑
- Developed "AadhareEse" - a simulated Aadhar card generation system for educational and learning purposes.

Book Management

- **Project :** ■ GitHub ☑
- Developed a Node.js project for managing a book library, allowing users to add, edit, and remove books efficiently.
- Implemented search and filter functionalities, enabling users to find books by title, author, or other criteria.
- Utilized MongoDB for data storage, ensuring robustness and scalability of the system.

Internship

- **Project :** ■ Github ☑
- Developed a platform to help students discover internship opportunities across colleges.
- Implemented a search feature allowing users to find internships by college name.
